Greater Noida, India | +91 9917665417 | mohiitpal@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFILE

---

Software engineer with a Computer Science (AI & ML) background, building full-stack and Generative AI applications. Comfortable working across the stack - from React/Node.js applications to Python/Flask services - with practical exposure to cloud infrastructure and observability tooling monitoring, debugging, and maintaining production systems. Strong foundation in data structures, algorithms, and object-oriented design, with a track record of shipping and supporting real client-facing software.

## PROJECTS

---

### MindLog - AI Journaling Companion - Personal Project

Feb 2026 - May 2026

- Built an AI journaling assistant using GPT-style language models with contextual memory via Retrieval-Augmented Generation (RAG).
- Developed a Node.js/Express backend integrating PostgreSQL and pgvector for structured and vector data.
- Deployed a React frontend with JWT authentication on Vercel and Render, using S3-compatible file storage.
- Implemented secure user sessions and API routes to support persistent, context-aware journaling conversations.

### CI/CD Metrics Dashboard - Personal Project

Mar 2025 - Aug 2025

- Developed a CI/CD metrics dashboard to monitor build performance, test execution, and pipeline reliability using Flask, PostgreSQL, and Grafana.
- Designed and implemented RESTful APIs for storing, retrieving, and managing build metadata and automated test results.
- Integrated GitHub Webhooks to trigger CI/CD workflows automatically and executed builds inside Docker containers for isolated, reproducible environments.
- Built interactive Grafana dashboards to visualize build success rates, execution time, and test failure metrics, alongside a web interface for manually triggering builds and monitoring pipeline status in real time.

## EXPERIENCE

---

### Trainee - HCL Technologies

01/2025 - 03/2025

- Completed a 3-month structured training program in Java programming, object-oriented design, and AI-assisted software development.
- Developed and tested Java-based applications applying OOP, collections, exception handling, and file management.
- Practiced industry-standard development workflows through hands-on coding exercises and real-world scenarios.

## SKILLS

---

**Languages:** JavaScript, Python, Java, C, C++

**Web & Frameworks:** React, Node.js, Express.js, REST APIs, Flask, Django, HTML/CSS, Bootstrap

**Databases:** MongoDB, MySQL, PostgreSQL, pgvector, SQLAlchemy

**Cloud & Infrastructure:** AWS, GCP, Azure, Docker, CI/CD pipelines, Git, GitHub

**Observability & Monitoring:** Datadog, Grafana, PagerDuty

**Core Concepts:** Data Structures, Algorithms, Complexity Analysis, Operating Systems, Distributed Systems, OOD, Agile

## CERTIFICATES & ACHIEVEMENTS

---

- LeetCode Knight badge; 1st and 3rd place finishes in a Regional Competitive Programming Contest (AICTE Sankalp Sankalan, Delhi University, April 2025)
- Java Development with AI - HCL Technologies
- Udemy Certified HTML and CSS Course - June 2025

## EDUCATION

---

### B.Tech, Computer Science and Engineering (AI & ML)

09/2022 - 05/2026

Dr. A. P. J. Abdul Kalam Technical University, Greater Noida
